How to upgrade TP-LINK Wireless N Router

Notice:

1. Before upgrading：

- **Please verify the hardware version of your device for the firmware version.Wrong firmware upgrading may damage your device and void the warranty.** How to check over the hardware version of a TP-LINK device?(Page 3 for details)

- Write down all the settings you changed from the default values, since you may need to reenter them manually.(Page 4 for details)

- It's recommended that users stop all Internet Applications on the computer, or simply disconnect Internet line from the device before upgrading.

2. During upgrading：

- **Do NOT** upgrade the firmware through **wireless** connection unless the device only has wireless connection;

- **Do NOT turn off the power or cut down the Ethernet cable during upgrade process;**

- Internet Explorer(IE) is the recommended web browser for upgrading firmware.

Steps about upgrading:

Step 1   Log into the TP-LINK device by typing http://tplinkwifi.net in the address bar of the web browser (such as Internet Explorer, Firefox). The default user name and password are both **admin**.

Step 2   Click **Advanced ->System Tools ->Firmware Upgrade**, click the **Browse** button to choose the firmware you already extracted in the folder. **The firmware is usually named as XXXX.bin;**

Firmware Upgrade

Firmware File Path: 选择文件 未选择任何文件
Firmware version: 0.9.1 3.16 v0001.0 Build 161011 Rel.60105n
Hardware version: TL-WR840N v4 00000004

Upgrade

Step 3   Click the **Upgrade** button. The device will reboot automatically after the upgrading has been finished. Please wait about 3 minutes.

Step 4   Verify that the router's firmware has been upgraded.

Status

Firmware Version: 0.9.1 3.16 v0001.0 Build 161011 Rel.60105n
Hardware Version: TL-WR840N v4 00000004

How to check the hardware version of a TP-LINK device?

1. Check from management page.

Log into the device, click **Advanced ->System Tools ->Firmware Upgrade**, The software and hardware version will be shown as the following picture:
(As an example, in the following picture, the hardware version is 'V4')

2. **Check from label**

Turn over the device, you can see a label at the back of the device, there is a character string **"Ver:X.Y"** (for example, Ver:1.0) and the number X is the **hardware version** of the device. If the string is "Ver: 1.1", it means that the hardware version is V1.

How to Backup&Restore configuration of TP-LINK Wireless Router
1. **Log into the device, Click Advanced -> System Tools -> Backup&Restore.**

2. **Click the Backup button and save the file. The file name is config.bin**
3. **After firmware upgrading , at the same page click the browse and find the configuration file which have been backup**
4. **Finally click Restore, then wait a minute you can see configuration uploaded successfully.**
